## Eni Blasia 460

#### APPLICATIONS

**Eni Blasia 460** is a gear oil with EP characteristics for enclosed industrial gears lubricated with splash or circulation systems especially where high loads and temperatures, high speeds and sliding friction is present.

**Eni Blasia 460** can be also used to lubricate other heavily-loaded components such as couplings, transmission screws and low speed plain bearings.

Suitable for use in oil-mist lubrication systems.

#### **CUSTOMER ADVANTAGES**

- Protection of lubricated components during operation thanks to a robust antiwear additive system
- Resistance to high operative temperatures (up to 100 °C) due to very good antioxidant properties
- Non-corrosive behaviour against gaskets and seals as well as metals such as steel, cast iron, copper and bronze
- Quick separation from water that could accidentally enter the system thanks to an outstanting demulsive capacity

#### **SPECIFICATIONS & APPROVALS**

- ISO-L-CKD
- ISO 12925-1 CKD
- DIN 51517- 3 CLP
- AIST No.224
- AGMA 9005-E02
- DAVID BROWN \$1.53.101 level
- Fives Cincinnati P-35 level
