

# eni Litio Grease 475

**eni Litio Grease 475** is a special smooth-textured, lithium-base grease.

## CHARACTERISTICS (TYPICAL VALUES)

<b>Consistency NLGI</b>		<b>1,5</b>
Worked penetration	dmm	300
Dropping point	°C	190
Oil Viscosity at 40°C	mm <sup>2</sup> /s	220

## PROPERTIES AND PERFORMANCES

**eni Litio Grease 475** is characterized by a good pumpability, excellent adhesiveness, mechanical and water wash-out resistance.

## APPLICATIONS

**eni Litio Grease 475** is particularly suitable for the lubrication of machinery operating in dusty and humid environment and where is required a strong adhesiveness on the components to be lubricated.

## CLASSIFICATIONS

**eni Litio Grease 475** meets the requirements of the following classifications:

- DIN 51825 KH 1,5 -10
- ISO-L-XABDA 1,5

## NOTICE

**eni Litio Grease 475** is not recommended for the lubrication of rolling bearings.
