

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Revision date: 27/05/2013 Version: 2.0

Supersedes: 16/01/2002

#### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

Trade name : eni CT 350 EP (NLGI 3)

EC index no : N/A

EC no : N/A

CAS No : N/A

REACH registration No : N/A

Product code : 5251

Formula : 2012-2011

Product group : Trade product

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

#### 1.2.1. Relevant identified uses

Intended for general public

Main use category : Industrial use, Professional use

Industrial/Professional use spec : Wide dispersive use

Use of the substance/mixture : General purpose lubricant

----

Do not use the product for any purposes that have not been advised by the manufacturer. In that case, the user could be exposed to unpredictable risks.

Function or use category : Lubricants and additives

#### 1.2.2. Uses advised against

No additional information available

#### 1.3. Details of the supplier of the safety data sheet

ENI S.p.A.

P.le E. Mattei 1 - 00144 ROMA Italy

Tel (+39) 06 59821 www.eni.com

Contact:

#### **SECTION 2: Hazards identification**

#### 2.1. Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP]

Not classified

Classification according to Directive 67/548/EEC or 1999/45/EC

Not classified

#### Adverse physicochemical, human health and environmental effects

Prolonged and repeated skin contact may cause reddening, irritation and dermatitis, due to a defatting effect. Slightly irritant to eyes.

#### 2.2. Label elements

According to EC directives or the corresponding national regulations there is no labelling obligation for this product.

General advice: "Use adequate gloves when handling the product. Deliver used/leftover product and container to a waste collection point. Protect the environment.".

### 2.3. Other hazards (not relevant for classification)

Physical/chemical : This product is combustible, but not classified as Flammable. The creation of

flammable vapour mixtures takes place at temperatures which are higher than

normal ambient levels.

Health : If the product is handled or used at high temperature, contact with hot product or

vapours may cause burns.,Any material in case of accidents involving pressurized circuits and the like, may be accidentally injected under the skin, even without external damage. In such a case, the victim should be brought to an hospital as soon as possible, to get specialized medical treatment.,Do not wait for symptoms to

develop.

Environment : None.
Contaminants : None.

This substance/mixture does not meet the PBT criteria of REACH, annex XIII.

This substance/mixture does not meet the vPvB criteria of REACH, annex XIII.

#### SECTION 3: Composition/information on ingredients

#### 3.1. Substances

Not applicable

11/10/2013 EN (English) 2/16

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

Revision date: 27/05/2013

Version: 2.0

#### 3.2. Mixture

Composition/information on ingredients

: Mineral base oil, severely refined

Thickeners. Additives

All the mineral base oils contained in this product have a value < 3 % wt of DMSO extract, according to IP 346/92 (Nota L - Dir. 94/69/CE - Reg (CE) 1272/2008)

Hazardous ingredients and/or with relevant occupational exposure limits

: See table

Name	Product identifier	%	Classification according to Directive 67/548/EEC
Mineral base oil, severely refined		90 - 95	Not classified
(Main component)			

Name	Product identifier	%	Classification according to Regulation (EC) No. 1272/2008 [CLP]
Mineral base oil, severely refined (Main component)		90 - 95	Not classified

Full text of R-, H- and EUH-phrases: see section 16

#### **SECTION 4: First aid measures**

## 4.1. Description of first aid measures

First-aid measures general

: In case of spontaneous vomiting, transport the victim to a hospital, to verify the possibility that the product has been aspired into the lungs.

First-aid measures after inhalation

: In case of disturbances owing to inhalation of vapours or mists, remove the victim from exposure; keep at rest; if necessary, seek medical attention. See also Point 4.3.

First-aid measures after skin contact

: Take off contaminated clothing and shoes. Wash thoroughly with soap and water. If inflammation or irritation persists, seek medical advice. In case of contact with hot product, cool affected part with plenty of cold water, and cover with gauze or clean cloth. Call a doctor or bring to an hospital. Do not use salves or ointments, unless directed by doctor. Body hypothermia must be avoided. Do not put ice on the burn.

First-aid measures after eye contact

: Rinse eyes thoroughly for at least 15 minutes. Keep eyelids well apart. If irritation persists, seek medical advice. In case of contact with hot product, cool affected part with plenty of cold water, and cover with gauze or clean cloth. Call a doctor or bring to an hospital. Do not use salves or ointments, unless directed by doctor.

First-aid measures after ingestion

: Do not induce vomiting. If the person is conscious, rinse mouth with water without swallowing. Keep at rest. Call for medical assistance or bring to an hospital. If the casualty is unconscious, place in the recovery position. In case of spontaneous vomiting, keep head low, to avoid the risk of aspiration into the lungs. Do not give anything by mouth to an unconscious person.

## 4.2. Most important symptoms and effects, both acute and delayed

Symptoms/injuries after inhalation

: This product has a low vapour pressure, and in normal conditions at ambient temperature the concentration in the air is negligible. A significant concentration may build up only if the product is used at high temperature, or in case of sprays and mists. In these cases overexposure to vapours may cause irritation to airways, nausea and dizziness.

11/10/2013 EN (English) 3/16

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

Revision date: 27/05/2013

Version: 2.0

Symptoms/injuries after skin contact

: Prolonged and repeated skin contact may cause reddening, irritation and dermatitis, due to a defatting effect. Contact with hot product may cause thermal burns.

Symptoms/injuries after eye contact

: Contact with eyes may cause a light transient irritation. Contact with hot product or vapours may cause burns.

Symptoms/injuries after ingestion

: Accidental ingestion of small quantities of the product may cause irritation, nausea and gastric disturbances. Taking into account the taste of the product, however, ingestion of dangerous quantities is very unlikely.

Symptoms/injuries upon intravenous administration

: Not applicable.

#### 4.3. Indication of any immediate medical attention and special treatment needed

Seek medical attention in all cases of serious burns.

#### **SECTION 5: Firefighting measures**

#### 5.1. Extinguishing media

Suitable extinguishing media

: Small-size fires: carbon dioxide, dry chemicals, foam, sand or earth. Large fires: foam or water fog (mist). These means should be used by trained personnel only. Other extinguishing gases (according to regulations).

Unsuitable extinguishing media

: Do not use water jets. They could cause splattering, and spread the fire.

#### 5.2. Special hazards arising from the substance or mixture

Fire hazard

: This product is combustible, but not classified as Flammable. The creation of flammable vapour mixtures takes place at temperatures which are higher than normal ambient levels.

Explosion hazard

: In case of losses from pressurized circuits, the sprays may form mists. Take into account that in this case the lower explosion limit for mists is about  $45 \text{ g/m}^3$  of air.

Combustion products

: Incomplete combustion is likely to give rise to a complex mixture of airborne solid and liquid particulates, gases, including carbon monoxide, NOx, H2S and SOx,Oxygenated compounds (aldehydes, etc.),LiOx,CaOx,ZnOx,POx.

#### 5.3. Advice for firefighters

Firefighting instructions

: Shut off source of product, if possible. If possible, move containers and drums away from danger area. Spilled product which is not burning should be covered with sand or foam. Use water sprays to cool containers and surfaces exposed to the flames. If the fire cannot be controlled, evacuate area.

Special protective equipment for firefighters

: Personal protection equipment for firefighters (see also sect. 8). Self-contained breathing apparatus.

Other information

: In case of fire, do not discharge residual product, waste materials and runoff water: collect separately and use a proper treatment.

#### **SECTION 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

General measures

: Stop or contain leak at the source, if safe to do so. Eliminate all ignition sources if safe to do so (e.g. electricity, sparks, fires, flares). Avoid accidental sprays on hot surfaces or electrical contacts. Large spillages may be cautiously covered with foam, if available, to limit fire risk.

#### 6.1.1. For non-emergency personnel

Protective equipment : See Section 8.

11/10/2013 EN (English) 4/16

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

Revision date: 27/05/2013

Version: 2.0

Emergency procedures

: Avoid direct contact with released material. Alert emergency personnel. Except in case of small spillages, the feasibility of any actions should always be assessed and advised, if possible, by a trained, competent person in charge of managing the emergency.

#### 6.1.2. For emergency responders

Protective equipment

: Small spillages: normal antistatic working clothes are usually adequate. Large spillages: full body suit of chemically resistant and antistatic material. if necessary heat resistant and insulated. Work gloves providing adequate chemical resistance, specifically to aromatic hydrocarbons. Gloves made of PVA are not water-resistant, and are not suitable for emergency use. If contact with hot product is possible or anticipated, gloves should be heat-resistant and thermally insulated. Work helmet. Antistatic non-skid safety shoes or boots. Goggles and /or face shield, if splashes or contact with eyes is possible or anticipated. Respiratory protection: a half or full-face respirator with filter(s) for organic vapours (AX), or a Self-contained Breathing Apparatus (SCBA) can be used according to the extent of spill and predictable amount of exposure. A Self Contained Breathing Apparatus (SCBA) can be used according to the extent of spill and predictable amount of exposure. If the situation cannot be completely assessed, or if an oxygen deficiency is possible, only SCBA's should be used.

**Emergency procedures** 

: Notify local authorities according to relevant regulations.

#### 6.2. Environmental precautions

Prevent product from entering sewers, rivers or other bodies of water. In case of soil contamination, remove contaminated soil and treat in accordance with local regulations.

#### 6.3. Methods and material for containment and cleaning up

For containment

: Soil. If necessary dike the product with dry earth, sand or similar non-combustible materials. Collect free product with suitable mechanical means. Collect recovered product and other materials in suitable tanks or containers for recovery or safe disposal. Dispose of in accordance with relevant local regulations. Water: Confine the spillage. Remove from surface by skimming or suitable floating absorbents. Collect recovered product and other waste materials in suitable waterproof, oil resistant containers. Recover or dispose of according to local regulations. Do not use solvents or dispersants, unless specifically advised by an expert, and, if required, approved by local authorities.

Other information

: Recommended measures are based on the most likely spillage scenarios for this material; however, local conditions (wind, air temperature, wave/current direction and speed) may significantly influence the choice of appropriate actions. Local regulations may also prescribe or limit actions to be taken. For more information regarding protective equipment see section "Exposure control/personal protection".

#### 6.4. Reference to other sections

See Section 8.

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

Revision date: 27/05/2013

Version: 2.0

## **SECTION 7: Handling and storage**

#### 7.1. **Precautions for safe handling**

Precautions for safe handling

: Ensure that all relevant regulations regarding handling and storage facilities of flammable products are followed. Keep away from heat/sparks/open flames/hot surfaces. Use and store only outdoors or in a well-ventilated area. Before entering storage tanks and commencing any operation in a confined area (e.g. tunnels), carry out an adequate clean-up, and check the atmosphere for oxygen content and flammability. Emptied containers can contain combustible product residues. Do not cut, weld, drill, burn or incinerate empty containers or drums, unless they have been drained and cleaned.

Handling temperature

: 0 - 65 °C

Hygiene measures : Avoid contact with skin. Do not breathe fume/ mist/ vapours. Do not ingest. Do not smoke. Do not eat and do not drink during use. Do not clean hands with dirty or oilsoaked rags. Do not re-use clothes, if they are still contaminated. Keep away from

food and beverages.

#### Conditions for safe storage, including any incompatibilities

Storage conditions

: Store in dry, well ventilated area. Keep away from open flames, hot surfaces and

sources of ignition. Do not smoke. : Keep away from: strong oxidants.

Incompatible products Storage temperature

: 0 - 55 °C

Storage area

: Storage area layout, tank design, equipment and operating procedures must comply with the relevant European, national or local legislation. Storage installations should be designed with adequate bunds so as to prevent ground and water pollution in case of leaks or spills. Cleaning, inspection and maintenance of internal structure of storage tanks must be done only by properly equipped and qualified personnel as

Packages and containers:

: If the product is supplied in containers: Keep containers tightly closed and properly labelled. Keep only in the original container or in a suitable container for this kind of

product.

Packaging materials

: For containers, or container linings use materials specifically approved for use with this product. Recommended materials for containers, or container linings use mild steel, stainless steel. Some synthetic materials may be unsuitable for containers or container linings depending on the material specification and intended use.

Compatibility should be checked with the manufacturer.

defined by national, local or company regulations.

## Specific end use(s)

No information available.

## SECTION 8: Exposure controls/personal protection

#### 8.1. **Control parameters**

Mineral base oil, severely refined		
Austria	MAK (mg/m³)	5 mg/m³ (Mineral base oil mist, severely refined, DMSO <3% m/m)
Belgium	Limit value (mg/m³)	5 mg/m³ (Mineral base oil mist, severely refined, DMSO <3% m/m)
Italy - Portugal - USA ACGIH	ACGIH TLV®-TWA (mg/m³)	5 mg/m³ (Mineral base oil mist, severely refined, DMSO <3% m/m)

Safety Data Sheet According to Regulation (EC) No. 453/2010

DNEL/DMEL (Workers)	
Long-term - systemic effects, inhalation	= 5,4 mg/m³/day (DNEL, Mineral base oil mist, severely refined, DMSO <3% m/m)
DNEL/DMEL (General population)	
Long-term - local effects, inhalation	= 1,2 mg/m³/day (DNEL, Mineral base oil mist, severely refined, DMSO <3% m/m)

Monitoring methods

: Monitoring procedures should be chosen according to the indications set by national authorities or labour contracts., Refer to relevant legislation and in any case to the good practice of industrial hygiene.

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

Revision date: 27/05/2013

Version: 2.0

Additional information

: Note: The Derived No Effect Level (DNEL) is an estimated safe level of exposure that is derived from toxicity data in accord with specific guidance within the European REACH regulation. The DNEL may differ from an Occupational Exposure Limit (OEL) for the same chemical. OELs may be recommended by an individual company, a governmental regulatory body or an expert organization, such as the Scientific Committee for Occupational Exposure Limits (SCOEL) or the American Conference of Governmental Industrial Hygienists (ACGIH). OELs are considered to be safe exposure levels for a typical worker in an occupational setting for an 8-hour work shift, 40 hour work week, as a time weighted average (TWA) or a 15 minute short-term exposure limit (STEL). While also considered to be protective of health, OELs are derived by a process different from that of REACH.

#### 8.2. Exposure controls

Appropriate engineering controls

 Before entering storage tanks and commencing any operation in a confined area (e.g. tunnels), carry out an adequate clean-up, and check the atmosphere for oxygen content and flammability.

Personal protective equipment (for industrial or professional use)

: Face shield. Gloves. Protective clothing. Safety glasses. Safety shoes or boots. Dust/aerosol mask.

Hand protection

: When there is a risk of contact with the skin, use hydrocarbon-resistant, felt-lined gloves. Materials that are presumably adequate: nitrile (NBR) or PVC with a protection index > 5 (permeation time > 240 mins). Use gloves respecting all the conditions and within the limits set by the manufacturer. Replace gloves immediately in case of cuts, holes or other signs of damages or degradation. If necessary, refer to the EN 374 standard.

Eye protection

: When there is a risk of contact with the eyes, use safety goggles or other means of protection (face shield). If necessary, refer to national standards or to the EN 166 standard.

Skin and body protection

: Long-sleeved antistatic clothing, if necessary heat-resistant. If necessary, refer to the EN 340 and related standards, for definition of characteristics and perfomance according to the risk rating of the area. Antistatic non-skid safety shoes or boots, chemical resistant, if necessary heat resistant and insulated.

Respiratory protection

: Independently from other possible actions (technical modifications, operating procedures, and other means to limit the exposure of workers), personal protection equipment can be used according to necessity. Open or well ventilated spaces: in presence of oil mists and if the product is handled without adequate containment means: use full or half-face masks with filter for mists/aerosols. In case there is a significant presence of vapours (e.g. through handling at high temperature), use full or half-face masks with filter for hydrocarbon vapours. (EN 136/140/145). Closed or confined areas (e.g. tank interiors): the use of protection measures for airways (masks or self-contained breathing apparatus), must be assessed according to the specific activity, as well as level and duration of predicted exposure. (EN 136/140/145).

Thermal hazard protection

: If contact with hot product is possible or anticipated, gloves should be heat-resistant and thermally insulated.

Environmental exposure controls

: Do not discharge the product into the environment. Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed. Storage areas/installations should be designed with adequate bunds so as to prevent ground and water pollution in case of leaks or spills.

Consumer exposure controls

: Not applicable.

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

**Revision date: 27/05/2013** 

Version: 2.0

#### 8.3. **Hygiene measures**

General protective and hygienic measures : Avoid contact with skin and eyes, Do not breathe vapours or mists., Do not clean hands with dirty or oil-soaked rags., Do not keep dirty rags in the overall pockets., Do not drink, eat or smoke with dirty hands., Wash hands with water and mild soap, do not use solvents or other irritant products which have a defatting effect on the skin.,Do not re-use clothes, if they are still contaminated.

### SECTION 9: Physical and chemical properties

#### Information on basic physical and chemical properties

Physical state : Solid

**Appearance** : Stiff paste.

Molecular mass : Not applicable for mixtures

Colour : Amber.

Odour : Slight odour of petroleum.

Odour threshold : There are no data available on the preparation/mixture itself.

рΗ : Not applicable

Relative evaporation rate

(butylacetate=1)

: Negligible.

: Drop point  $\geq$  180 °C (ASTM D 566) Melting point

Freezing point : No data available

: ≥ 200 °C (ASTM D 1160) Boiling point

: ≥ 230 °C (ASTM D 93) Flash point

: ≥ 300 °C (DIN 51794) Self ignition temperature

Decomposition temperature : No data available

Flammability (solid, gas) : No data available

Vapour pressure : ≤ 0,1 hPa (20 °C) (Mineral oil, ASTM D 5191) (CONCAWE, 2010)

Relative vapour density at 20 °C : No data available

: No data available Relative density

Density :  $\geq$  900 kg/m<sup>3</sup> (15 °C) (ASTM D 4052) Solubility : Water: Immiscible and insoluble

Log Pow : Not applicable for mixtures

Log Kow : No data available

Viscosity, kinematic : Not applicable (ASTM D 445)

Viscosity, dynamic : No data available

11/10/2013 EN (English) 9/16

#### Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

Revision date: 27/05/2013

Version: 2.0

Explosive properties : None.

Oxidising properties : None.

Explosive limits : LEL  $\geq$  45 g/m<sup>3</sup> (Aerosol)

#### 9.2. Other information

VOC content : = 0 % (EU, CH)

#### **SECTION 10: Stability and reactivity**

#### 10.1. Reactivity

This mixture does not offer any further hazard for reactivity, except what is reported in the following paragraphs.

#### 10.2. Chemical stability

Stable product, according to its intrinsic properties (in normal conditions of storage and handling).

#### 10.3. Possibility of hazardous reactions

None (in normal conditions of storage and handling). Contact with strong oxidizers (peroxides, chromates, etc.) may cause a fire hazard. A mixture with nitrates or other strong oxidisers (e.g. chlorates, perchlorates, liquid oxygen) may create an explosive mass. Sensitivity to heat, friction or shock cannot be assessed in advance.

#### 10.4. Conditions to avoid

Keep away from strong oxidizers. Keep away from open flames, hot surfaces and sources of ignition. Avoid the build-up of electrostatic charge.

#### 10.5. Incompatible materials

Strong oxidants.

#### 10.6. Hazardous decomposition products

None.

#### **SECTION 11: Toxicological information**

#### 11.1. Information on toxicological effects

Acute toxicity : Not classified (Based on available data, the classification criteria are not met)

(according to composition)

eni CT 350 EP (NLGI 3) (N/A)	
LD50 oral rat	≥ 2000 mg/kg bodyweight (Calculated data).
LD50 dermal rat	≥ 2000 mg/kg bodyweight (Calculated data).
LC50 inhalation rat (mg/l)	≥ 5 mg/l/4h (Calculated data).

Mineral base oil, severely refined	
LD50 oral rat	> 5000 mg/kg (OECD 401)
LD50 dermal rat	> 5000 mg/kg (OECD 402)

**Revision date: 27/05/2013** 

Version: 2.0

# SECTION 12: Ecological information

12.1. Toxicity	
Ecology - general	: According to the components, and by comparison with other products of the same type and composition, it is expected that this product has a toxicity for aquatic organisms > 100 mg/l, and must not be regarded as dangerous to the environment. An uncontrolled release to the environment may nevertheless produce a contamination of different environmental compartments (soil, underground, surface water bodies, aquifers). Handle according to general working hygiene practices to avoid pollution and release into the environment.
Ecology - air	: This product has a low vapour pressure. A significant exposure may happen only if the product is used at high temperature, or in case of sprays and mists.
Ecology - water	: This product is not soluble in water. It floats on water and forms a film on the surface. The damage to aquatic organisms is of mechanical kind (immobilization and entrapment)

eni CT 350 EP (NLGI 3) (N/A)

#### 12.2. **Persistence and degradability**

eni CT 350 EP (NLGI 3) (N/A)	
Persistence and degradability	The most significant constituents of the product should be considered as "inherently biodegradable", but not "readily biodegradable", and they may be moderately persistent, particularly in anaerobic conditions.

Mineral base oil, severely refined	
Persistence and degradability	The most significant constituents of the product should be considered as "inherently biodegradable", but not "readily biodegradable", and they may be moderately persistent, particularly in anaerobic conditions.

#### 12.3. **Bioaccumulative potential**

eni CT 350 EP (NLGI 3) (N/A)	
Log Pow	Not applicable for mixtures

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

Revision date: 27/05/2013

Version: 2.0

#### 12.4. Mobility in soil

No additional information available

#### 12.5. Results of PBT and vPvB assessment

eni CT 350 EP (NLGI 3) (N/A)		
This substance/mixture does not meet the PBT criteria of REACH, annex XIII.		
This substance/mixture does not meet the vPvB criteria of REACH, annex XIII.		
Results of PBT-vPvB assessment	The components in this formulation do not meet the criteria for classification as PBT or vPvB. The product should be considered prudentially as "Persistent" in the environment, according to the REACH Annex XIII criteria (point $1.1$ )	

Mineral base oil, severely refined		
This substance/mixture does not meet the PBT criteria of REACH, annex XIII.		
This substance/mixture does not meet the vPvB criteria of REACH, annex XIII.		
Results of PBT-vPvB assessment	This substance does not meet the criteria for classification as PBT or vPvB. The product should be considered prudentially as "Persistent" in the environment, according to the REACH Annex XIII criteria (point 1.1)	

#### 12.6. Other adverse effects

Other adverse effects

Other information

: None.

: This product has no specific properties for inhibition of bacterial activity. In any case, wastewater containing this product should be treated in plants that are suited for the specific purpose.

#### **SECTION 13: Disposal considerations**

#### 13.1. Waste treatment methods

Waste treatment methods

: Do not dispose of the product, either new or used, by discharging into sewers, tunnels, lakes or water courses. Deliver to a qualified official collector.

Sewage disposal recommendations

: Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed. Dispose of in a safe manner in accordance with

local/national regulations.

Waste disposal recommendations

: European Waste Catalogue code(s) (Decision 2001/118/CE): 13 02 05\* (mineral-based non-chlorinated engine, gear and lubricating oils). This EWC code is only a general indication, and takes into account the original composition of the product and its intended use. The user has the responsibility of choosing the right EWC code, considering the actual use of the product, alterations and contaminations.

Additional information

: Empty containers may contain combustible product residues. Do not cut, weld, drill, burn or incinerate empty containers or drums, unless they have been cleaned, and declared safe.

Ecology - waste materials

: The product as it is does not contain halogenated substances.

#### **SECTION 14: Transport information**

In accordance with ADR / RID / ADNR / IMDG / ICAO / IATA

#### 14.1. UN number

No dangerous good in sense of transport regulations

11/10/2013 EN (English) 13/16

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

Revision date: 27/05/2013

Version: 2.0

#### 14.2. UN proper shipping name

Proper Shipping Name : Not applicable

#### 14.3. Transport hazard class(es)

Subsidiary risk (IMDG) : -Subsidiary risk (IATA) : --

#### 14.4. Packing group

Not applicable

#### 14.5. Environmental hazards

Other information : None.

#### 14.6. Special precautions for user

Special transport precautions : None.

#### 14.6.1. Overland transport

Transport regulations (ADR) : Not subject
Transport regulations (RID) : Not subject
State during transport (ADR-RID) : Not applicable

Classification code : --Limited quantities (ADR) :

#### 14.6.2. Transport by sea

Transport regulations (IMDG) : Not subject

Transport regulations (ADNR) : Not subject

Port Regulation Law : Not applicable.

Limited quantities (IMDG) : Not applicable.

EmS-No. (1) : -MFAG-No : --

#### 14.6.3. Air transport

Transport regulations (IATA) : Not subject
Instruction "cargo" (ICAO) : Not applicable
Instruction "passenger" (ICAO) : Not applicable
Instruction "passenger" - Limited : Not applicable

quantities (ICAO)

## 14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

IBC code : None.

#### **SECTION 15: Regulatory information**

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

### 15.1.1. EU-Regulations

No REACH Annex XVII restrictions

No ingredients are included in the REACH Candidate list (> 0,1 % m/m).

11/10/2013 EN (English) 14/16

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

Revision date: 27/05/2013

Version: 2.0

Relevant EU Legislation

: Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH). (et sequens).

Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006 (et sequens).

Directives 89/391/CEE, 89/654/CEE, 89/655/CEE, 89/656/CEE, 90/269/CEE, 90/270/CEE, 90/394/CEE, 90/679/CEE, 93/88/CEE, 95/63/CE, 97/42/CE, 98/24/CE, 99/38/CE, 99/92/CE, 2001/45/CE, 2003/10/CE, 2003/18/CE (Health and safety on the workplace)

Directive 98/24/EC (protection of the health and safety of workers from the risks related to chemical agents at work).

Directive 92/85/CE (measures to encourage improvements in the safety and health at work of pregnant workers and workers who have recently given birth or are breastfeeding)

Directives 96/82/CE and 2003/105/CE (Control of major-accident hazards involving dangerous substances)

Directive 2004/42/CE (Limitation of emissions of Volatile Organic Compounds) Labelling according to directives 67/548/EEC and 1999/45/EC

VOC content : = 0 % (EU, CH)EURAL code (EWC) : 13 02 05\*

## 15.1.2. National regulations

Maladies professionelles (F)

: RG 36 - Affections provoquées par les huiles et graisses d'origine minérale ou de

Water hazard class (WGK) (D)

WGK remark

Storage class (LGK) (D)

VbF class (D)

Regional legislation

- synthèse
- : 1 (according to composition)
- : Classification based on the components in compliance with Verwaltungsvorschrift wassergefährdender Stoffe (VwVwS)
- : LGK 13 Non-flammable solids in non-flammable packages
- : Not applicable.
- : National adoption of EU Directives concerning health and safety on the workplace. National laws on classification and labeling of dangerous substances/preparations (Adoption of Directive 67/548/CE and subsequent Adaptations to Technical Progress - ATP, and Directive 1999/45/CE). National adoption of EU Directives concerning control of major-accident hazards involving dangerous substances (96/82/CE -2003/105/CE). Relevant national laws on prevention of water pollution. Relevant national laws on protection of the health of pregnant workers (National adoption of Dir. 92/85/EEC). National adoption of Directives 75/439/CEE - 87/101/CEE concerning disposal of used oils.

#### Chemical safety assessment

For the following substances of this mixture a chemical safety assessment has been carried out

Mineral base oil, severely refined

#### **SECTION 16: Other information**

Indication of changes

: Modification according to Regulation (EC) nr. 1907/2006 and nr. 453/2010.

Data sources

: This Safety Data Sheet is based on the real characteristics of the components and their combination, taking into account the information provided by the suppliers.

11/10/2013 EN (English) 15/16

Safety Data Sheet

According to Regulation (EC) No. 453/2010

Product code: 5251

Revision date: 27/05/2013

Version: 2.0

Abbreviations and acronyms

: Complete text of the phrases H and R quoted in this Safety Data Sheet. These phrases are reported here for information only, and MAY NOT correspond to the classification of the product.

N/A = Not applicable.

N/D = Not available

ACGIH = American Conference of Governmental Industrial Hygienists

API = American Petroleum Institute CSR = Chemical Safety Report

DNEL = Derived No Effect Level

DMEL = Derived Minimum Effect Level EC50 = Effective Concentration, 50% EL50 = Effective Loading, 50 %

EPA = Environmental Protection Agency IC50 = Inhibition Concentration, 50% LC50 = Lethal Concentration, 50%

LD50 = Lethal Dose, 50% LL50 = Lethal Loading, 50%

LOAEL = Low Observed Adverse Effects Level

NOEL = No Observed Effects Level

NOAEL = No Observed Adverse Effects Level

OECD = Organization for Economic Cooperation and Development

PNEC = Predicted No-Effect Concentration PBT = Persistent, Bioaccumulative, Toxic STOT = Single Target Organ Toxicity

(STOT) RE = (Single Target Organ Toxicity) Repeated exposure (STOT) SE = (Single Target Organ Toxicity) Single exposure TLV®TWA = Threshold Limit Value® - Time-Weighted Average TLV®STEL = Threshold Limit Value® - Short Term Exposure Limit

UVCB = Substance of Unknown or Variable composition, Complex reaction products

or Biological materials

vPvB = very Persistent, very Bioaccumulative

WAF = Water Accommodated Fraction.

: Provide adequate training to professional operators for the use of PPEs, according to  $% \left\{ 1\right\} =\left\{ 1\right\} =\left\{$ 

the information contained in this Safety Data Sheet.

: Do not use the product for any purposes that have not been advised by the manufacturer. In that case, the user could be exposed to unpredictable risks.
