

# AGIP GR VN

AGIP GR VN is a special product designed for use in launching and slipping of ships. It is formulated from a paraffin-wax base.

## CHARACTERISTICS (TYPICAL FIGURES)

### AGIP GR VN

Penetration at 15°C	dmm	10
Melting point	°C	65

## PROPERTIES AND PERFORMANCE

- AGIP GR VN is applied hot to slipways where it forms a pressure-resisting levelling layer on which hull-supports slide during launching.
- After complete solidification it is necessary to apply a layer of AGIP GR CC 4 grease, which provides the actual lubrication during the launching operation.
